	Baseball, Cricket, and Tennis (Brent Rushall)	0.1
Preface		0.5
THE SCIENCE OF BASEBALL PITCHING		
PART I - INTRODUCTION: WHY SCIENCE? (Brent S. Rushall)		1.1
1	Belief-based Versus Evidence Based Coaching	1.3
	Fundamental Definitions	1.3
2	Information in Baseball	2.1
3	An Example of Bad Baseball Science	3.1
	Introduction	3.1
	Assessment of Original Articles Supporting Overweight and Underweight Baseballs as Effective Training Devices	3.2
	Overweight Baseball Training for Pitchers	3.2
	Underweight Baseball Training for Pitchers	3.5
	A Scientific Principle for Training Pitchers	3.6
	Theoretical Challenges for Weighted Baseball Studies	3.7
	Research Challenges for Weighted Baseball Studies	3.10
	Conclusions	3.11
	Postscript	3.12
PART II - BASIC PHYSICS AND BIOMECHANICS OF BASEBALL PITCHING (Brent S. Rushall)		4.1
4	The Aerodynamics of a Baseball in Flight	4.3
	Three Characteristics of Air	4.3
	Air Resistance	4.3
	Drag Force on a Baseball	4.5
	Factors Involved in Drag Force Development	4.6
	Baseballs with Spin	4.9
	A Rotating Baseball in Flight	4.12
	Forces on a Spinning Ball	4.15
	Torque	4.17
	Controlling Torque	4.17
	The Special Case of the Knuckle Ball	4.20
	The Air Environment	4.21
5	Fundamental Mechanics in Pitching Actions	5.1
	Forms of Movement	5.1
	Descriptive Elements of Movements	5.1
	Center of Gravity	5.5
	Action Components of a Pitched Ball	5.6

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	Height and Range of a Thrown Ball	5.8
	Angular Motion Vectors	5.11
	Levers	5.12
	Forms of Rotation in a Pitcher's Body Segments	5.13
	Gravity	5.15
	Newton's Three Laws of Motion	5.15
	Developing Maximum Pitching Velocity	5.18
	Speed of Movements	5.18
	Four Sequential, Positional, and Timing Factors	5.19
	Example of Throwing a Fastball	5.23
	Segment Sequences and Relative Velocities in a Fastball Pitch	5.26
	What Happens When a Successful Movement Is Altered Incorrectly?	5.30
	The Role of the Shoulder, Arm, Wrist, and Fingers in Pitching Velocity	5.34
PART III - BASIC NEUROMUSCULAR STRUCTURES AND PHYSIOLOGY RELEVANT TO PITCHING (Brent S. Rushall)		6.1
6	Motor Units, Nerves, and Muscle Contractions	6.3
	Motor Units	6.3
	Nerves	6.3
	Muscle Contractions	6.4
	Properties of Muscular Forces	6.5
	Elastic Energy	6.6
7	Strength, Power, and Speed	7.1
	Strength	7.1
	Power	7.2
	Speed	7.3
8	The Specificity of Neuromuscular Patterns	8.1
	Sensory Organs in the Skeletal System	8.1
	The Specificity of Neuromuscular Patterns	8.1
PART IV - THE PSYCHOLOGY OF BASEBALL PITCHING (Brent S. Rushall)		9.1
9	Sources of Stress and Distractions Associated with Baseball Games	9.3
	Limitations of Problem Handling	9.3
	Adaptation to New Environments	9.3
	Game-readiness	9.6
	Controlled Readiness	9.7
	Anxiety	9.7
	Loss of Attentional Control	9.8
	Coach and Official Over-reactions	9.9
	Source of Input	9.9
10	Mental and Physical Factors that Affect a Pitcher's Performance	10.1
	Physiological Arousal Level	10.1
	Level of Ability	10.2
	The Competitive Environment	10.2

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	Personal and Social Importance of the Game	10.2
	Self-assessment of Preparation Adequacy	10.3
	Experience with Preparation Procedures	10.3
	Health, Fatigue, and/or Injury	10.3
	Individuality	10.3
11	Game Planning and Preparation	11.1
	Planning Strategies	11.1
	Coping Skills	11.2
	Goal-setting	11.2
	Mental Imagery	11.4
12	Essential Features of Pitching Game Psychology	12.1
	Positive Thinking	12.1
	Content Decision-making	12.1
	Negative Self-fulfilling Prophecy	12.3
	The Coping Skill	12.3
	Segmenting a Performance	12.4
	Mental Characteristics in Baseball	12.5
13	The Structure of Pre-game Strategies	13.1
	Away from the Ballpark	13.1
	Wake-up Procedures	13.1
	Normal Planned Routine	13.3
	At the Ballpark	13.4
	Initial Mental Activity	13.4
	Warm-up	13.5
	Game Build-up Routine	13.6
	The Preparation of Pre-game Strategies	13.10
14	The Structure of Game Strategies	14.1
	Segmenting the Game Performance	14.1
	Task-relevant Content	14.3
	Mood Words	14.6
	Positive Self-statements	14.8
	Coping Behaviors	14.10
	Psychological Intensification	14.11
	The First Innings	14.13
	Debriefing	14.13
	Learning Game Strategies	14.14
15	Managing Games and Practices to Evoke the Best Skilled Performance	15.1
PART V - MOTIVATION IN BASEBALL (Brent S. Rushall)		16.1
16	Motivational Factors for Pitchers	16.3
	General Design Features for Motivation	16.4
	Achievement as a Motivator	16.4
	Recognition as a Motivator	16.6

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	Responsibility as a Motivator	16.6
	Advancement as a Motivator	16.7
	Growth as a Motivator	16.8
	Baseball Activity as a Motivator	16.9
17	Specific Behavior Motivation	17.1
	Determine Important and Productive Behaviors	17.1
	Individualize the Needs of Athletes	17.3
	Establish Behavioral Goals	17.4
	Forms of Motivation and Reinforcement	17.4
	Types of Reinforcers	17.6
18	Sources of Motivational Influence	18.1
	The Athlete	18.1
	The Peer Group	18.2
	The Coach	18.3
	Outside Sources	18.4
	Producing Behavior Permanence	18.4
	Suppressing Undesirable Behaviors	18.6
19	Overall Summary	19.1
20	Motivational Problems in Baseball Settings	20.1
21	Measuring Motivation	21.1
22	Goal-setting	22.1
	Types of Goals	22.1
	Characteristics of Setting Specific and Intermediate Goals	22.2
	Steps in Goal-setting	22.3
	The Relationship between Goals and Practice	22.4
	Multiple Goals	22.4
23	Group Relationships in Baseball	23.1
	The Player-team Relationship	23.1
	The Coach-player Relationship	23.1
	The Player-to-player Relationship	23.1
PART VI - COACHING PITCHERS (Brent S. Rushall)		24.1
24	Seven Principles that Govern Coaching Behaviors and Expectations	24.3
	The Principle of Specificity	24.3
	The Principle of Individuality	24.7
	The Principle of Self-control	24.9
	The Principle of Involvement	24.11
	The Principle of Program Consolidation	24.13
	The Principle of Self-involvement	24.13
	The Principle of Balanced Preparation	24.13

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
25	Characteristics of Effective Coaching	25.1
	The Provision of a Totally Planned System	25.1
	The Maximization of Productivity	25.2
	The Maximization of Direction	25.2
	The Maximization of Intrinsic Motivation	25.2
	The Maximization of the Instructional Process	25.3
	The Maximization of Positive Experiences	25.3
	The Maximization of Social Experiences	25.3
	The Maximization of Progress Information	25.3
	The Transfer of Control to the Group/Self	25.4
	The Maximization of Content Variety	25.4
26	Twelve Typical Symptoms of the Decline of Coaching Effectiveness	26.1
27	Backward Shaping as the Teaching Progression for Pitching	27.1
	Teaching Progressions	27.1
	Structuring Backward Progressions	27.5
	Correcting Errors	27.7
28	The Pitching Coach as a Teacher	28.1
	Instruct with Backward Progressions	28.1
	Provide Feedback	28.2
	Encourage Imagery in Practice and Games	28.4
	Establish a Goal (Purpose) for Every Pitch at Practice and in Games	28.4
	Periodically Re-teach with Backward Progressions	28.5
	Periodically Offer Booster Instruction Sessions for Elements of Skills	28.6
	Use Blocks of Repetitions for Instruction	28.6
	Perform Associated Activities	28.8
	Evaluate if a Good Practice Session Was Conducted	28.8
	Drills	28.9
	The Transfer Paradox	28.13
PART VII - FOUNDATIONAL PRINCIPLES OF CONDITIONING		
	(Brent S. Rushall)	29.1
29	The Role of Conditioning in Baseball Pitching	29.3
	Conditioning Myths in Baseball Pitching	29.4
	Strength and Pitching	29.5
	The Value of Conditioning	29.6
30	Fitness for Pitching	30.1
	Components of Fitness for Pitching	30.1
	Fitness for the Individual	30.2
	Variations in Attention to Fitness	30.2
	Factors that Modify Training and Performance	30.3
31	Energy Capacities of the Body	31.1
	Energy Systems	31.1
	Transport of Oxygen	31.2

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	Physiological Capacities and Baseball Pitching	31.3
	Elastic Energy: The Seldom Mentioned but Most Important Energy Source for Pitching	31.3
32	Generalized Responses to Training	32.1
	The Form of the Basic Training Response to Exercise	32.2
	The Microcycle of a Training Segment	32.3
	Exact Programming	32.5
	Heavy Training Stimuli	32.5
	Training Stimuli That Are Too Easy	32.7
	Training Stimuli That Are Too Infrequent	32.7
33	Training Segment Overload	33.1
	The Principle of Overload	33.1
	Training Segment Overload	33.1
34	Practice Session Overload	34.1
	Practice Session Overload	34.1
	Maintenance-Training	34.4
35	The Principle of Recovery	35.1
	The Principle of Recovery	35.1
	Recovery from Training Stimuli within a Training Session	35.1
	Recovery from Training Sessions	35.5
	Diet	35.6
	Physical Capacity Differences	35.7
	Recovery from Long-term Exhaustion	35.8
	Recovery and Reversibility	35.9
36	The Principle of Specificity for Physical Conditioning	36.1
	The Principle of Specificity for Physical Conditioning	36.1
	Muscle Group Specificity	36.1
	Implications of Specificity for Coaching	36.3
37	The Principle of Individuality	37.1
	Tolerance of Training Loads	37.1
	Responsiveness to Conditioning	37.1
	Recovery from Training and Competitions	37.2
	Conditioning Needs	37.3
	Training Preferences	37.3
	Nutritional Preferences	37.3
	Environmental Tolerance	37.5
	Physical Characteristics	37.5
	Life-style Variations	37.6
	Social Interactions within the Group	37.6

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
38	Excessive Fatigue	38.1
	The Abuse of Training Principles	38.1
	Fatigue Due to a Training Stimulus	38.1
	Fatigue between Training Sessions	38.2
	Overtraining	38.3
	Prevention of Overtrained States	38.5
	Measuring the Occurrence of Training Abuses	38.6
	Uses of the <i>DALDA</i>	38.9
	The Training Response	38.9
	Monitoring Daily Training	38.9
	Excessive Training Sessions	38.11
	Training Sessions That Are Too Easy	38.12
	Monitoring Overtraining	38.12
	Monitoring Travel Disruptions	38.13
	Monitoring Outside Stresses	38.14
39	Biophysical Factors that Affect Pitching Performance	39.1
	Heredity	39.1
	Age	39.1
	The Physical Environment	39.2
	Heat	39.2
	Pollution	39.5
	Jet-lag, Travel Fatigue, and Life-style Shifts	39.6
	Nutrition	39.10
	Cold and Altitude	39.14
PART VIII - PROGRAMMING PRINCIPLES FOR CONDITIONING		
	(Brent S. Rushall)	40.1
40	Endurance Training – Extending the Volume of Work	40.5
	Endurance Training	40.5
	Central Changes: The Oxygen Transport System	40.6
	Peripheral Changes: The Musculoskeletal System	40.7
	Methods of Training	40.9
	Continuous Training	40.9
	Fartlek Training	40.11
	Recommendations for Aerobic Fitness	40.12
	Suggested Aerobic Conditioning Program for General Fitness	40.12
	Interval Training	40.13
	General Considerations	40.16
	Recommendations for Specific Fitness	40.17
41	Strength Training	41.1
	Physiological Responses to Strength Training	41.1
	Neural Adaptations	41.1
	Hypertrophy or Hyperplasia?	41.2
	Cellular Adaptations	41.3
	Muscular Endurance	41.3

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	Cardiovascular Adaptations	41.3
	Variables that Modify Traditional Strength Training	41.4
	Speed of Development	41.4
	Loss of Strength	41.5
	Exercise Technique	41.6
	Velocity of Exercise Movement	41.7
	Resistance Magnitude	41.8
	Contraction Type	41.8
	Specificity of Strength Training	41.9
	Cross-training	41.12
	Programming Variables in Strength Training	41.13
	Isotonic Strength Training	41.13
	Factors to Consider in Strength Training	41.15
	Final Considerations	41.17
42	Power Training	42.1
	Power Training	42.3
	Plyometrics	42.3
	Extra-load Training	42.8
	Explosive Power Training	42.8
43	Speed Training	43.1
	Speed Training	43.1
	Effects of Speed Training	43.2
	Mental Set in Speed Training	43.3
	Programming Speed Training	43.5
	Skill	43.5
	Fitness	43.6
44	Stretching	44.1
	Sane and Abusive Stretching	44.1
	Reinterpretation of the Value of Stretching	44.4
	Considerations for Stretching	44.7
	Stretching/Flexibility Methods	44.11
	Recommendations	44.15
45	Planning Training Sessions, Microcycles, and Macrocycles	45.1
	The Importance of Skill Learning	45.1
	Structuring a Training Session	45.2
	Structuring Session Microcycles	45.5
	Structuring Macrocycles	45.6
	Planning Training Programs	45.8
46	Basic Concepts for Annual Planning	46.1
	The Relationship of Basic to Specific Training	46.2
	Planning Features	46.6
	General Planning Considerations	46.7

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
47	Phases in Annual Plans	47.1
	Transition Phase	47.1
	Basic Preparatory Phase	47.1
	Specific Preparatory Phase	47.2
	Precompetition Phase	47.3
	Competition Phase	47.5
	The Peculiar Challenge of Very Long Competitive Seasons	47.5
	Scholastic and Collegiate Sports	47.9
	Planning	47.9
48	Coaching Implications for Physical Conditioning	48.1
	Determination of the Physical Capacities of Pitchers	48.2
	Planning	48.3
	Specific Coaching Factors	48.5
THE ART OF BASEBALL PITCHING		
PART IX - PITCHING	(Dick Mills)	49.1
49	Why Another Pitching Book and Why This One Is Different	49.3
	Unfounded Coaching Beliefs about Activities Used to Improve Pitching Performance	49.4
	Weighted Baseballs and Velocity	49.6
	The Many Fallacies of Baseball Conditioning and Strength Training	49.8
	Are Pitching Drills Really a Good Tool to Repair Improper Mechanics?	49.10
50	How Coaches' Beliefs Have Perpetuated Improper Training Routines	50.1
	Influences on Coaching Content	50.1
	Strength, Flexibility, Mechanics, and Drills	50.4
	Between Game Throwing Routines	50.16
	The Introduction and Development of Irrelevant Throwing	50.19
	More on Drills	50.21
	Recognizing Good Mechanics and Common Mechanical Pitching Faults	50.25
51	Analysis of the Complete Pitching Delivery	51.1
	The Mechanics of the Out-of-the-Stretch Position	51.1
	The Mechanics Out-of-the-Wind-up Position	51.2
52	Pitching Considerations: Tempo, Rhythm, and Faults	52.1
	Tempo and Rhythm	52.1
	Common Mechanical Faults in Pitching	52.3
53	Pitching Strategy: How to Use Command of All Pitches to Upset a Hitter's Timing	53.1
	Fastball Command: A Key Component to a Successful Strategy	53.1
	Every Pitcher Should Have Four Fastballs	53.2

(continued on next page)

TABLE OF CONTENTS (continued)

TOPIC	TITLE	PAGE
	The Importance of the Change-up to Enhance a Strategy and Boost Overall Performance	53.3
	How to Use Ball Movement	53.6
	Using Several Strategies	53.6
	Increasing Uncertainty about What Pitch Will Be Thrown	53.7
	An Interview with Left-handed Pitcher Barry Zito about His Pitching Strategy	53.8
	Other Strategy Considerations	53.12
	How to Pitch to Any Hitter	53.13
	Change Location by Moving the Ball In and Out	53.14
	How to Change Strategy When There Are Base-runners	53.15
54	The Various Pitches and Their Grips	54.1
	Four-seam Fastball Grip	54.2
	Two-seam Fastball Grip	54.4
	Change-up Grip	54.6
	Curveball Grip	54.6
	Curveball Release	54.9
	Slider Grip	54.9
	REFERENCES	55.1
	APPENDICES	56.1
	A <i>Individual Motivations Checklist for Baseball</i>	56.1
	B The Self-appraisal of Practice Session Coaching Performance	56.5
	C The <i>Daily Analyses of Life Demands for Athletes (DALDA)</i>	56.13
	INDEX	57.1
